

U860 Ultra-Filtration Cartridge

**Ultra-Flo Pte Ltd** is an integrated water and wastewater treatment provider with manufacturing of high quality filtration membrane using the latest in polymeric membrane technology.

The company develops designs and manufactures its own membrane to market individually or as a system offering the best price/performance solutions in the treatment of water and wastewater, covering the following processes:

- ◆ Water Clarification
- ◆ Water Recycling
- ◆ Water Upgrading
- ◆ Disposal Compliance

Ultra-Flo membrane cartridges, systems and MBR are exported globally and for various applications:

- ◆ River/Bore-hole water clarification
- ◆ Industrial Effluent Treatment
- ◆ Desalination
- ◆ Emergency/Natural Disasters
- ◆ Membrane Bioreactor

The company provides DBOO (design, build, own and operate) services and excels in the treatment of industrial wastewater.

Since 2004, the company has been a test-bedding partner with PUB (Singapore local water authority) for sewage and industrial wastewater MBR (membrane bioreactor) development. These activities resulted in it being a recipient of the "Industrial Technologies Award" for Industry Innovation and Advancement Leadership in the Industrial Water and Wastewater Treatment Equipment Markets by Frost & Sullivan, a global growth consulting company.
